A discussion is what I had in mind. In the event that you had something already prepared I wanted to make sure I had the technology ready. We will have maps in both paper and electronic format so we can point and gesticulate.

Hi Phil,
We could present material if that would be helpful for you. I guess at this point I'm a little uncertain about what you would like us to do. If we are simply going to have a discussion of the issues surrounding potential conflicts between mining and BB salmon, we might not need to present any material via computer.

Daniel
